

CyberLink Power2Go 7

Burn Any Media to Any Disc

Datasheet

CyberLinks Power2Go 7 is an all-in-one solution for burning any data into any disc format and for easily turning home videos into pro-like DVDs or Blu-ray discs, as well as images into high-quality photo galleries. Designed for home users as well as enterprises, its functions range from industrial grade data encryption to a hassle free desktop burning gadget. With Power2Go 7, you can perform tasks that can normally only be achieved by using a suite of applications.

CyberLinks Power2Go 7 – the software that burns any data to your favorite media disc format. Everyone can now easily burn discs, create amazing video menus and safeguard precious data against unwanted access.

Key Product Highlights

- **Supports BDXL Discs** – Power2Go 7 supports the latest BDXL disc format that allows you to burn up to 128GB on a single disc
- **Burn Any Media to Any Disc** - Burns data, photo, music, videos onto Blu-ray, DVDs and CDs. Also supports mixed media CD burning.
- **Robust Data Encryption** – **New robust 256-bit encryption and added password reminder give your data added security.**
- **Speedy Burning Process** – GPU-acceleration supported by ATI® Stream and NVIDIA® CUDA™ increases the speed of the encoding and decoding process for video disc burning.
- **New HD Photo Gallery** – Get the best out of your photos, when you showcase them in interactive slideshows created with Power2Go in their original image quality.
- **.ISO Image Viewer** – Duplicate CDs, unprotected DVDs and Blu-rays discs easily with Power2Go 7. You can also access and extract files and folders directly from an .ISO image without the need to burn onto disc.
- **Desktop Burning Gadget** – Burn discs easily right on your desktop with Power2Go's new Desktop Gadget. Simply drag & drop the files to the gadget and the Desktop Gadget does the rest for you – without even opening the Power2Go application.

CyberLink Power2Go 7

Burn Any Media to Any Disc

Datasheet

- **Fully customizable Disc Authoring** – Create pro-like video DVDs with customizable stylish menus that can be played on PCs and CEs and download unlimited FREE Menu Templates from DirectorZone.com.
- **Audio Enhancement** – With CyberLink's built-in WaveEditor, you can now perform audio enhancement and trimming for your burning needs. WaveEditor also facilitates ripping audio from CDs and burning them to MP3.
- **Online Sharing** – Conversion to video formats used by popular social networking websites and a direct upload feature means posting videos to Facebook and YouTube has never been easier.
